

decade ago. If this were the only figure, this 17,000, it would be huge by any measure. But, in fact, you find thousands and thousands of contract employees. If you wonder where the rest of these employees are, there are 6,000 in Washington, there is another approximately 1,200, a 1,000 to 1,300 in 10 regional offices across the country.

When I get down to my State of Florida, we had a total, I believe, of 65 EPA employees in this particular fiscal year.

So people who think that EPA is out there in the States protecting the environment, it is not so. They are in Washington, and they are passing countless rules and regulations. A tremendous amount is spent on administration.

And then some of the programs we have heard talked about like Superfund. Superfund, I have explained to the House, over 80 percent of the funds on Superfund have been spent on attorney fees and studies.

I had a gentleman visit me in my office yesterday, and he said a Superfund site in Florida was identified in 1984. He said it went through a half a dozen project administrators and they still have not done anything to resolve the problems of the Superfund site. That is in Florida.

Here is a site in Nevada. Lyon County commissioners, and this is part of a release from them, asked the U.S. Environmental Protection Agency to halt mercury cleanup program of the Carson River. The mercury that they were going to clean up is left over from mining operations of the Comstock Lode in the 1800's.

Then we have another example, of Vermont here, Burlington, Vermont. Twelve years ago, after a site was picked there to clean up some hazardous waste left over from a coal gasification plant, nothing was done. They spent millions of dollars. Very little was done in the way of environmental cleanup.

So we are paying more, we are getting less, and the more I talk about this, the more examples that are brought for me from across the country, and that is part of the debate. Republicans favor protecting the environment, preserving the environment. Republicans favor clean water, clean air, clean land. But when you spend money like this, when the money goes for a bureaucracy like this, and it does not go for a cleanup, then we have a real problem.

I want to quote as I get towards the end here a comment from Carol Browner, EPA administrator, who said in the New York Times in 1993, in November: "When I worked at the state level, I was constantly faced with rigid rules that made doing something 110 times more difficult and expensive than it needed to be. It makes no sense to have a program that raises costs while doing nothing to reduce environmental threats."

Now, that is Carol Browner, former Florida EPA administrator, comment-

ing on her experience in dealing with the Federal Government.

So, Mr. Speaker, I call on Carol Browner, I call on this administration, I call on my colleagues, to stop paying more and getting less. We can do a better job if we concentrate and effectively utilize our limited taxpayer dollars.

A SPECIAL DAY, A SPECIAL EVENT, AND VERY SPECIAL STUDENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. DE LA GARZA] is recognized for 5 minutes.

Mr. DE LA GARZA. Mr. Speaker, this past weekend I participated in an Earth Day celebration back home in my district. The event was a Hometown Trees celebration and took place at the Kika de la Garza Elementary school whose principal is Mr. Jose Louis Trigo.

We planted a live oak tree in remembrance of the children of the Oklahoma bombing tragedy. This was donated by first grader Amy Sojak and her classmates. Amy and her classmates are students of Miss Veronica Galvan. Fourth grade student Joel Espinoza was the master of ceremonies. And awards were presented to the following students for their essays which emphasized the special and unique benefits provided by trees: Victor Villarreal, Brandi Martinez, Andres Aguilar, Juan Carlos Lopez, and Denise Sepulveda.

What was particularly exciting about the occasion is that 10 year old Victor Villarreal was recognized as the Hometown Trees National Essay Contest Winner for the Southwest region. He is the son of Guadalupe and Francisca Villarreal.

Over the past 5 years, Hometown Trees, sponsored by IGA supermarkets, Louisiana-Pacific and Coca-Cola, has teamed up with thousands of local volunteers in communities nationwide to ensure that the future generations will enjoy the ecological and aesthetic benefits of trees. This year, as part of the Hometown Trees initiative, IGA sponsored a nationwide environmental essay contest for children age 12 and under.

Young Victor won the contest—quite an accomplishment and one of which he can be very proud. His essay was chosen for its uniqueness and creativity. It vividly captures the importance of trees from a child's perspective.

It reads: "Trees are important in my hometown because at La Joya, 'The Jewel of the Valley,' we treasure trees—our jewels. They add that special spark that only nature can provide. Anything that mother nature creates, is a true treasure that no other power can originate. Treasure your jewels!"

To specifically honor Victor's accomplishment a tree donated by IGA and Carl's Grocery was planted. It will forever be a living monument to him. These trees will be enjoyed by all the community.

What made this occasion particularly unique for me is that I feel the sentiments expressed by Victor are shared by his fellow students. What I saw in the faces of the youngsters was an eagerness not just to participate in an event for the one day we officially recognize as Earth Day, but rather a desire to make every day Earth Day.

This tells me that as we celebrate this 26th Anniversary we have passed on to our children and grandchildren how important it is to look after our environment in the way we live our lives every day. That is quite an accomplishment—and Victor, and all of his fellow students, are quite an outstanding group of youngsters.

THE 81ST ANNIVERSARY OF THE ARMENIAN GENOCIDE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan [Mr. DINGELL] is recognized for 5 minutes.

Mr. DINGELL. Mr. Speaker, I join all of my colleagues today in commemoration of April 24, 1996, the 81st anniversary of the Armenian genocide which occurred under such tragic circumstances 81 years ago, and it is my purpose to join with my colleagues to insist that such inhumanity never be repeated again.

Mr. Speaker, today we are recalling the loss of 1½ million Armenians who were killed and a half million more who were driven from Turkey. No person of any decency can do other than oppose this sort of inhumanity, and all join in a statement of hope for a world free of genocide and ethnic conflict.

I have the great privilege to represent a large and active Armenian population, many of whom have parents and grandparents who were amongst the persecuted religious, political, and intellectual leaders in the turn of the century Armenia.

Today's Michigan community of Armenians follow the great tradition of doing much to further the commercial, political, and intellectual growth of Michigan and of the country. It is my hope that today's effort to honor the victims and the survivors of this genocide will educate all of us, will educate our neighbors country men and all of the world's people so that peace remains a priority of this Nation.

Mr. Speaker, this is the 81st anniversary of the Armenian genocide. We look back to honor those who have died, but we also look forward and say, "Never again."

BUDGET SHORTFALL FOR NATIONAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. HUNTER] is recognized for 5 minutes.

Mr. HUNTER. Mr. Speaker, a couple of days ago I announced, along with the chairman of the Committee on National Security, that we were going to address a shortfall in funding under the Clinton administration budget that seriously impeded the capability of our pilots to operate their aircraft effectively and safely. That was done on the heels of the hearing in which we talked about the three, now four, F-14 crashes since the first of January and the three
